

The BCD Value for Manufacturing Facilities

The Need for Video Surveillance at Manufacturing Facilities

Behind construction, manufacturing is the third most dangerous occupation. Having a robust and reliable video surveillance infrastructure is critical to protect your business from liability and employees from injury. Secure systems can help mitigate workplace risks and minimize hazards, protect the company in the event of an operations audit, ensure safety in deliveries and shipments, secure the premises from intruders and so much more.

Benefits of BCD for Manufacturing

As one of the industry leaders for providing IP video data infrastructure solutions, BCD offers a wide range of solutions that tailor to the needs of manufacturing facilities. While each solution is purpose-built in one of our ISO 9001:2015 certified facilities, all BCD systems have the following attributes in common:

- NDAA, TAA and BAA compliant appliances
- Cyber-hardened hardware
- Validated with top VMS, video analytics and access control solutions
- [Harmonize iDRAC](#) for remote server monitoring directly through your VMS
- [Harmonize RMM](#) for full system health monitoring and predictive failure
- 24/7/365 pre- and post- sales support

Recommended Solutions

Harmonize Bridge

At any given time, hundreds or even thousands of cameras are receiving live video streams that need to be retrieved for playback with minimal latency. Hybrid cloud storage offers a scalable, low-latency solution to meet any bandwidth intensive application. Harmonize Bridge provides seamless cloud connectivity to existing applications, without disruption, and provides [immediate disaster recovery](#) to protect critical data from being lost forever.

Milestone Rapid REVIEW Servers

BCD offers a range of video workstations and servers that come pre-loaded with [Milestone Rapid REVIEW](#). Powered by NVIDIA GPU's, these systems are hybrid cloud compatible and allow users to easily review hours of video in minutes to gather valuable data that can be turned into actionable insights and help secure your project site.
