

BCD Solutions for Genetec™ Security Center™

Purpose-built with BCD's exclusive technology

If it is important to reduce hardware resources, have manageability to the desktop, and eliminate third-party gateways to offset storage with disaster recovery to the cloud, then you must see leverage a BCD system that has the total solution for you, one that is more than just hardware.

DEEPSTOR STORAGE BUNDLES

BCD's Deepstor® SAN storage solutions provide business continuity by protecting critical video data, giving security professionals immediate access to video data. Deepstor® offers high availability and low latency, advanced data protection, and self-healing technology with ADAPT. Our Deepstor® solutions are available in VMS-verified bundles, including Genetec™ Security Center™, that pair a BCD206 rackmount server, pre-configured for Security Center, with a 5U 84 bay Deepstor® SAN.

Benefits

- High availability, low latency
- Advanced data protection
- Keep Your Hard Drive Warranty
- Pre-configured for easy installation

HARMONIZE RMM FOR GENETEC SECURITY CENTER

BCD's exclusive Harmonize RMM plug-in for Genetec™ Security Center™ gives users an easy-to-use tool that proactively monitors every device in your video surveillance system and predicts hardware failures seamlessly within Security Center while also sending notifications right to your email or cell phone when a device is at risk of failure. Harmonize RMM is vendor and VMS agnostic, giving you full freedom to customize your solution to your site needs.

Test our [interactive demo tool](#) to see just how simple it is to manage your system from the desktop!

HARMONIZE BRIDGE, POWERED BY TIGER TECHNOLOGY

BCD's hybrid cloud connectivity offering, Harmonize Bridge, provides security customers with a simple software add-on to connect Genetec™ Security Center™ VMS to any cloud provider for data protection and storage extension to the cloud. This cost-effective solution allows users to leverage the processing power of the cloud without any disruption to existing applications or daily workflows. Eliminate third party gateways and additional hardware while managing everything through Security Center!

BCD Solutions for Genetec™ Security Center™

Purpose-built with BCD's exclusive technology

FEATURE	WHY IT MATTERS
Longevity	Building Genetec Systems since 2014
Guaranteed Calculations	Removes the liability from end users, hardware design shortcomings are accountable by BCD
Purpose-built Configurations	Solutions are tailored to the needs of each Genetec project, not just off-the-shelf appliances
Enterprise TeamViewer License	Allows for instantaneous troubleshooting to maximize uptime
Harmonize Bridge	All systems have hybrid cloud functionality, meaning you can get access to instantaneous cloud connectivity and built-in disaster recovery
Harmonize RMM	Proactive system monitoring and management tool that integrates with every device from camera to network to VMS and beyond
Support	Extensive pre-sales and post-sales support, available 24/7/365 to ensure your system is always at peak performance
OTFD	We ship systems within days, not weeks or months
