BCD has designed, tested, and validated our best-of-breed hardware to withstand the most demanding video surveillance applications for Milestone XProtect® VMS and Rapid REVIEW.

Purpose-built with BCD's exclusive technology integrations, our Milestone XProtect-ready Appliances allow users to reduce hardware needed, proactively monitor system health directly through XProtect®, and eliminate third party gateways to offset storage with disaster recovery to the cloud.

BCD's Milestone Appliances are designed with Intel® Core™ and Xeon® processors and can be paired with NVIDIA GPU's to optimize each system for Rapid REVIEW video analytics.

For easy installation, BCD's Milestone XProtect-ready Appliances are shipped pre-installed with XProtect® Rapid REVIEW.
