

Salient Builds for Entry-Level to Enterprise Deployments

BCDVideo's Salient Product Line

VALUE SERIES

- 24/7 Duty Cycle SATA Drives
- Windows 10 Pro
- Intel® Core 10th Generation Processor
- Up to 96TB Raw Storage

STANDARD SERIES

- 24/7 Duty Cycle SATA Drives
- Windows Server 2019
- Intel® Xeon® Silver 4210 Processor
- Up to 416TB Raw Storage

PREMIUM SERIES

- Dual Port SAS drives
- Windows Server 2019
- Dual Intel® Xeon® Silver 4216 Processors
- Up to 416TB Raw Storage

WORKSTATIONS

- 24/7 Duty Cycle SATA Drives
- Windows 10 Pro
- Intel® Core™ Processor
- NVIDIA Quadro P620 Graphics Card

Salient Security Platform

BCDVideo's hardware supports the full functionality of Salient on various platforms.

BCDVideo fully supports all features of the Salient VMS, including CompleteView 20/20, TouchView Mobile, LPRTracker, TransactionTracker and ViewPoint. Internal testing has verified the Salient VMS can run at optimum performance on all BCDVideo platforms. This enables integrators to successfully and efficiently utilize all features of the VMS and the Salient Security Platform.

In addition to supporting the full functionality of the Salient VMS, integrators can benefit from BCDVideo's industry-leading hardware and a 5-year, on-site, next business day, Keep Your Hard Drive warranty that both lowers the total cost of ownership and helps conform to current data privacy regulations.

With BCDVideo, integrators can save hundreds of dollars in installation labor costs by ordering pre-loaded servers to meet customers' specific OS, the Salient VMS as well as imaging requirements. BCDVideo also is the only manufacturer in the industry that guarantees performance based on the project specifications.
