

exacqVision Builds for Entry-Level to Enterprise Deployments

BCD's exacq Product Line

VALUE SERIES

- 24/7 Duty Cycle SATA Drives
- Windows 10 Pro
- Intel® Core 10th Generation Processor
- Up to 96TB Raw Storage

STANDARD SERIES

- 24/7 Duty Cycle SATA Drives
- Windows Server 2019
- Intel® Xeon® Silver 4210 Processor
- Up to 416TB Raw Storage

PREMIUM SERIES

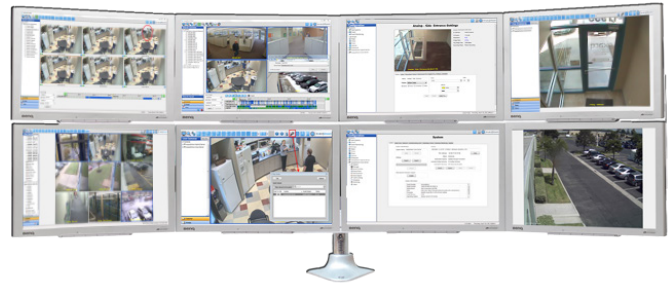

- Dual Port SAS drives
- Windows Server 2019
- Dual Intel® Xeon® Silver 4216 Processors
- Up to 416TB Raw Storage

WORKSTATIONS

- 24/7 Duty Cycle SATA Drives
- Windows 10 Pro
- Intel® Core™ Processor
- NVIDIA Quadro P620 Graphics Card

exacqVision VMS

BCD's hardware supports the full functionality of the exacq VMS on various platforms.

BCD appliances fully support all features of the exacqVision VMS for both Windows and Linux. In addition to supporting the full functionality of the exacq VMS, integrators can benefit from BCDVideo's industry-leading hardware and a 5-year, on-site, next business day, Keep Your Hard Drive warranty that both lowers the total cost of ownership and helps conform to current data privacy regulations.

With BCD, integrators can save hundreds of dollars in installation labor costs by ordering pre-loaded servers to meet customers' specific OS, the exacq VMS as well as imaging requirements. BCD is the only manufacturer in the industry that guarantees performance based on the project specifications.
