

# REVOLV

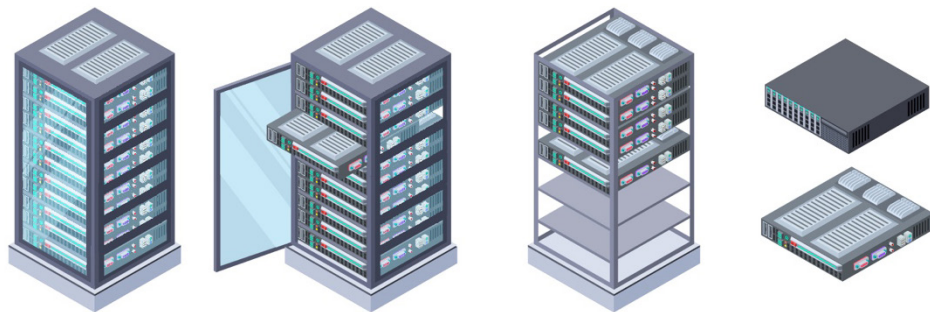

SECURITY BECOMES IT READY

## Need To Make A Quick Pivot?

The BCD International **REVOLV Rescue Program** was created to assist you in the event your current hardware provider has forced you into an unexpected pivot.

Using our newest innovation, **REVOLV** with **DEEPSTOR LITE™**, **DEEPSTOR™** or **DEEPSTOR+™**, we can reuse some or all of the current hardware you have on-site to allow you a seamless transition from the old to the new. We will also use your existing HCI, SQL and Windows Server 2019 software (assuming licenses allow)

For more info: **1-833-REVOLV-1** or [revolv@bcdinc.com](mailto:revolv@bcdinc.com)

## 6 Steps To Replace Your At-Risk hHCI System

- 1 CALL 1-833-REVOLV-1**  
It starts with a simple phone call. Our REVOLV team will provide you with a rescue form to get the process underway.
- 2 FILL OUT AND RETURN RESCUE FORM**  
The form will ask you to provide information on the current system that is at-risk. Number of servers and type, amount of storage, video management system, etc. You will fill this out and send back. If we discover incompatible hardware, we will discuss with you at this stage.
- 3 DECIDE IF RECORDED DATA IS TO BE KEPT**  
If you have recorded data that needs to be kept, we will arrange for a full REVOLV rack to be brought on site. This rack will allow us to retain recorded data. If no data is to be kept, then we use the REVOLV Rescue Rack as a part of the process by which we reuse the old hardware.
- 4 PROFESSIONAL SERVICES ARRIVES**  
BCD Professional Services, highly trained in all BCD products as well as video systems and hHCI, will come on site to manage the takeover process.
- 5 SYSTEM TAKEOVER**  
Your old hardware will be wiped clean and then used as the physical platform for REVOLV. This includes hard drives, switches, etc.
- 6 YOUR OLD SYSTEM IS MADE NEW**  
Your hardware investment has been kept intact, and you are now using the latest BCD innovation. You have one of the best service and support companies in our industry, and a system that will set you on a path forward as it serves your needs today.
